Sprint 1

All Pay Auction
CSCE 606 - Spring 2025

January 29, 2025

1 Team Roles

- Product owner: Jason Le

- Scrum master: Praewa Pitiphat

- Developers:

  - Arkan Abuyazid
  - Ruvail Shahzad
  - Steve Wang

---

2 Customer Meetings

2.1 Date/Time/Place

2.2 Summary

---

3 User Stories

1. User Story 1: Seller Creates an Auction
   As a seller,
   I want to create an auction with a closing date,
   so that I can start accepting bids for my item.

2. User Story 2: Bidder Places a Bid
   As a bidder,
   I want to place a bid in the auction,
   so that I have a chance to win the item.

3. User Story 3: Auctioneer Settles the Auction
   As an auctioneer,
   I want to settle the auction after the closing date,
   so that I can determine the winner and collect payments from all bidders.

4. User Story 4: Bidder Views Auction Status
   As a bidder,
   I want to view the current status of the auction,
   so that I can decide whether to place a bid or increase my bid.

5. User Story 5: Seller Views Auction Results
   As a seller, I want to view the results of the auction after it closes, so that I can see who won and how much was collected.
